This college has an enrollment of four hundred students.

The laboratory and hospital facilities are abundant.

The faculty consists of men who have distinguished themselves as medical educators.

The college is not burdened with debts, and is therefore able to expend all its income upon the courses of instruction.

The large attendance is evidence that the college is conducted in the interest of its patrons.

The calendar year is divided into three semesters of four months each. The fall semester begins on the last Tuesday of September. The winter semester begins on the first Monday in February. The summer semester begins on the first Monday in May.

ILLINOIS STATE BOARD OF HEALTH.

[EXTRACT FROM THE REVISED STATUTES OF ILLINOIS, 1907.]

Medicine and Surgery

Practice Regulated.

AN ACT TO REGULATE THE PRACTICE OF MEDICINE IN THE STATE OF ILLINOIS, AND TO REPEAL AN ACT THEREIN NAMED, IN FORCE JULY 1, 1899, AS AMENDED BY AN ACT IN FORCE JULY 1, 1907.

SECTION 1. ORGANIZATION AND DUTIES OF STATE BOARD OF HEALTH. Be it enacted by the People of the State of Illinois represented in the General Assembly: That the State Board of Health shall organize within three months after the passage of this act; it shall procure a seal and shall receive through its Secretary applications for certificates and examinations. The President and Secretary shall have the authority to administer oaths, and the board to take testimony in all matters relating to its duties.

SEC. 2. LICENSE FROM STATE BOARD OF HEALTH REQUIRED—APPLICATIONS FOR LICENSE—EXAMINATIONS—GRADUATES OF LEGALLY CHARTERED MEDICAL COLLEGES IN ILLINOIS IN GOOD STANDING GRANTED CERTIFICATES. No person shall hereafter begin the practice of medicine, or any of the branches thereof, or midwifery, in this State without first applying for and obtaining a license from the State Board of Health to do so. Application shall be had in writing, and shall be accompanied by the examination fees herein-after specified, and with proof that the applicant is of good moral character. Applications from candidates who desire to practice medicine and surgery in all their branches shall be accompanied by proof that the applicant is a graduate of a medical college or institution in good standing, as may be determined by the Board. When the application aforesaid has been inspected by the Board and found to comply with the foregoing provisions, the Board shall notify the applicant to appear before it for examination, at the time and place mentioned in such notice.

Examinations may be made in whole or in part in writing by the Board, and shall be of a character sufficiently strict to test the qualifications of the candidate as a practitioner. The examination of those who desire to practice medicine and surgery in all their branches shall embrace those general subjects and topics, a knowledge of which is commonly and generally required of candidates for the degree of doctor of medicine, by reputable medical colleges in the United States. The examination of those who desire to practice midwifery shall be of such a character as to determine the qualification of the applicant to practice midwifery. The examination of those who desire to practice any other system or science of treating human ailments who do not use medicines internally or externally, and who do not practice operative surgery shall be of a character sufficiently strict to test their qualifications as practitioners. All examinations provided for in this act shall be conducted under rules and regulations prescribed by the Board, which

shall provide for a fair and wholly impartial method of examination: *Provided*, that graduates of legally chartered medical colleges in Illinois in good standing as may be determined by the Board may be granted certificates without examinations.

Sec. 2a. The State Board of Health shall be empowered to establish a standard of preliminary education deemed requisite to admission to a medical college in "good standing," and to require satisfactory proof of the enforcement of this standard by medical colleges, provided that the Board shall not recognize examinations of applicants for admission to medical colleges, that have been conducted by the faculty or officers of a medical college. The Board shall also be empowered to determine the standing of literary or scientific colleges, high schools, seminaries, normal schools, preparatory schools, and the like, and the Board may, in its discretion, accept as the equivalent of one or more of the sessions or terms prescribed in its requirements governing medical colleges in "good standing," attendance in literary or scientific college in "good standing," as evidenced by a degree from said institution, providing that the standards of said literary or scientific college are fully equal to those of the State University of Illinois.

SEC. 3. LICENSE TO PRACTICE—PROVISIONS. If the applicant successfully passes his examination, or presents a diploma from a legally chartered medical college in Illinois of good standing, the Board shall issue to such applicant a license authorizing him to practice medicine, midwifery or other system of treating human ailments, as the case may be: *Provided*, that those who are authorized to practice other systems can not use medicine internally or externally or perform surgical operations: *Provided, further*, that only those who are authorized to practice medicine and surgery in all their branches shall call or advertise themselves as physicians or doctors: *And provided, further*, that those who are authorized to practice midwifery shall not use any drug or medicine or attend other than cases of labor. Such license shall be in such form as may be determined by the Board, and in accordance with the provisions of this act: *Provided, however*, that any willful violation on the part of an applicant of any of the rules and regulations of the Board governing examinations shall be sufficient cause for the Board to refuse to issue a license to such applicant. Such certificates shall be signed by all members of the Board and attested by the Secretary.

Sec. 3a. The State Board of Health may, in its discretion, issue a license, without examination, on the payment of the proper fees, to a physician, who is a graduate of a medical college in good standing, and has been licensed in any country, state or territory, in which the requirements of medical registration are deemed by the State Board of Health to have been practically equivalent to the requirements of medical registration in force in Illinois, under the provisions of the act to which this act is an amendment; provided, that such country, state or territory shall accord a like privilege to physicians who hold licenses issued by the Illinois State Board of Health. And the State Board of Health may also, in its discretion, issue a license, without examination, to a physician who is a graduate of a medical college in good standing, and has passed an examination before the United States Army, the United States Navy, or the United States Public Health and Marine Hospital Service.

Sec. 3b. For their services performed in the enforcement of this act and the act to which this act is an amendment, the members of the State Board of Health shall receive a compensation of ten (10) dollars per each day actually spent in attending to the business of the Board; provided, that the Board may fix a sum to be paid for each examination paper rated, and provided, further, that all such compensation shall be paid from the fees received by the Board and no part thereof shall be paid out of the State Treasury.

Italicized sections show amendments of 1907.

SEC. 4. CERTIFICATES TO BE RECORDED IN OFFICE OF COUNTY CLERK—RECORDS OF COUNTY CLERK. Every person holding a certificate from the State Board of Health shall have it recorded in the office of the clerk of the county in which he resides or practices within three months from its date, and the date of recording shall be endorsed thereon. Until such certificate is recorded, as herein provided, the holder thereof shall not exercise any of the rights or privileges conferred therein. Any person practicing in another county shall record the certificate in like manner in the county in which he practices, and the holder of the certificate shall pay to the county clerk the usual fee for making the record. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him, with the date of the issue of the certificate. The register of the county clerk shall be open to public inspection during business hours.

SEC. 5. EXAMINATION FEES. The fees for examination and for a certificate shall be as follows: Ten (10) dollars for examination in medicine and surgery, and five (5) dollars for a certificate if issued. Five (5) dollars for an examination in midwifery, and three (3) dollars for a certificate if issued. For all other practitioners ten (10) dollars for an examination and five (5) dollars for a certificate if issued.

SEC. 6. UNPROFESSIONAL OR DISHONORABLE CONDUCT—BOARD MAY WITHHOLD OR REVOKE CERTIFICATES—HEARING. The State Board of Health may refuse to issue the certificates provided for in this act to individuals who have been convicted of the practice of criminal abortion, or who have by false or fraudulent representation, obtained or sought to obtain practice in their profession, or by false or fraudulent representation of their profession have obtained or sought to obtain money or any other thing of value, or who advertise under names other than their own, or for any other unprofessional or dishonorable conduct, and the Board may revoke such certificates for like causes. *Provided*, that no certificates shall be revoked or refused until the holder or applicant shall be given a hearing before the Board.

SEC. 7. DEFINITION OF THIS ACT. Any person shall be regarded as practicing medicine, within the meaning of this act, who shall treat or profess to treat, operate on or prescribe for any physical ailment or any physical injury to or deformity of another: *Provided*, that nothing in this section shall be construed to apply to the administration of domestic or family remedies in cases of emergency, or to the laws regulating the practice of dentistry or of pharmacy. And this act shall not apply to surgeons of the United States army, navy or marine hospital service in the discharge of their official duties, or to any person who ministers to or treats the sick or suffering by mental or spiritual means, without the use of any drug or material remedy.

SEC. 8. ITINERANT VENDERS—LICENSE—PENALTIES. That any itinerant vender of any drug, nostrum, ointment or appliance of any kind intended for the treatment of diseases or injury, who shall, by writing or printing, or any other method, profess to the public to cure or treat disease or deformity by any drug, nostrum or application, shall pay a license of one hundred (100) dollars per month into the treasury of the Board, to be collected by the Board in the name of the people of the State of Illinois, for the use of said Board. And it shall be lawful for the State Board of Health to issue such license on application made to said Board, said license to be signed by the President of the Board and attested by the Secretary with the seal of the Board; but said Board may, for sufficient cause, refuse said license. And such itinerant vender who shall, by writing or printing, or any other method, profess to cure or treat disease or deformity by any drug, nostrum or appliance

without a license so to do, shall be deemed guilty of a violation of this section, and upon conviction shall be subject to the penalties hereinafter provided.

SEC. 9. PENALTY FOR PRACTICING WITHOUT LICENSE. Any person practicing medicine or surgery or treating human ailments in the State without a certificate issued by this Board in compliance with the provisions of this act, or any itinerant vender violating the provisions of section 8 of this act, shall for each and every instance of such practice or violation forfeit and pay to the people of the State of Illinois, for the use of the said Board of Health, the sum of one hundred (100) dollars for the first offense, and two hundred (200) dollars for each subsequent offense, the same to be recovered in an action of debt before any court of competent jurisdiction, and any person filing or attempting to file as his own, the diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction shall be subject to such fine and imprisonment as are made and provided by the statutes of the State for a crime of forgery: *Provided*, that this section shall not apply to physicians who hold unrevoked certificates from the State Board of Health issued prior to the time of the taking effect of this act.

SEC. 10. ENFORCING PENALTIES—APPEALS. Upon conviction of either of the offenses mentioned in this act the court shall, as a part of the judgment, order that the defendant be committed to the common jail of the county until the fine and costs are paid, and upon failure to pay the same immediately the defendant shall be committed under said order for first offense not more than thirty (30) days, and for each subsequent offense not more than ninety (90) days: *Provided*, that either party may appeal in the same time and manner as appeals may be taken in other cases, except that where an appeal is prayed in behalf of the people, no appeal bond shall be required to be filed, whether the appeal be from the justice of the peace or from the county or circuit courts, or from the appellate court. But it shall be sufficient in behalf of the people of the State of Illinois, for the use of the State Board of Health, to pray an appeal, and thereupon appeal may be had without bond or security.

SEC. 11. BOARD TO MAKE REPORT OF PROCEEDINGS AND PAY ALL FUNDS INTO THE STATE TREASURY ON SEPTEMBER 30TH OF EACH YEAR. On the 30th day of September of each year the State Board of Health shall make report of its proceedings, showing all items of receipts from all sources and disbursements for all purposes, and all funds in the treasury on said date which have been received in the enforcement of this act shall be paid into the State Treasury.

SEC. 12. REPEAL. An act to regulate the practice of medicine in the State of Illinois, approved July 17, 1887, in force July 1, 1887, and all other acts and parts of acts inconsistent with this act are hereby repealed.

SCHEDULE OF MINIMUM REQUIREMENTS FOR MEDICAL COLLEGES

IN FORCE JANUARY 1, 1903.

CONDITIONS OF ADMISSION TO LECTURE COURSES.

1st. Creditable certificates of good moral character signed by two physicians of good standing in the State in which the applicant last resided.

2d. As evidence of preliminary education, as a *minimum* requirement, a diploma or certificate of graduation from a high school; or a certificate signed by a principal of a regularly organized high school or by the examiner of the faculty of a reorganized literary or scientific college or university, or by the State Superintendent of Public Instruction, or a Superintendent of Public Schools, of having successfully passed an examination in all the several branches embraced in the curriculum of a four years' high school course. *The matriculation examination shall not be conducted by any member of the faculty of the medical college.*

The Illinois State Board of Health will require each applicant for a State certificate to present documentary evidence of his preliminary education together with his medical diploma, when taking the examination of the Board.

The conditions above set forth will govern in the case of all persons admitted to the Freshman Year of a medical college in "good standing," on or after January 1, 1903.

ADVANCED STANDING.

Applicants holding the degree A. B. or B. S. or an equivalent degree from a regularly established college of Arts or Science, which requires an attendance of three or more years as an essential to graduation, may be given credit for work done in the branches of the medical curriculum of the first year and may be advanced to the Sophomore Year of a four years' medical course, on condition that they comply with the entrance requirements of this Board and that they subsequently complete the work of the Freshman Year if not already completed, and that the work already taken shall *not* be below the standard required by this Board.

The same advanced standing may be allowed on the same conditions to applicants presenting a degree from a recognized College of Dentistry or College of Veterinary Medicine, or documentary evidence of having completed in a reputable University of College of Arts or Science, the major part of the work usually embraced in the curriculum of the freshman course of a recognized medical school.

No such advanced standing shall be allowed until after the applicant shall have either graduated as indicated or performed the work specified above, and not until three months after the completion of said work.

The above requirements for advanced standing will govern in the case of all persons admitted to the Sophomore Year of a medical college on or after January 1, 1903, and may be made operative prior to that time.

Graduates of medical colleges recognized at any time by the Illinois State Board of Health may be admitted to any class without examination. Students of said colleges who possess certificates of attendance and of successful examinations can enter without examination the term immediately following that previously attended. The student shall be required to pass an examination in all branches in which he has been found deficient. Students who have attended one or more full terms in colleges not fully recognized by this Board may be granted advanced standing in accordance with such attendance, on complying with the entrance requirements set forth in the Conditions of Admission to Lecture Courses, and passing all examinations and performing all laboratory work of the classes below that which they enter, providing that the work already done conforms to the requirements of this Board.

Graduates or students of colleges to which no recognition is given by the Illinois State Board of Health can be granted no advanced standing whatever.

LENGTH, NUMBER AND CHARACTER OF COURSES OF LECTURES.

The college shall have a four years' course of instruction consisting of four terms, extending over a period of four calendar years, and the minimum time between the commencement of the work of the Freshman Year and the ending of the work of the Senior Year, on which all students are required to be in attendance, shall be not less than forty months. No two terms begun on or after January 1, 1903, shall commence and end within any consecutive sixteen months.

The time occupied in each regular term begun on or after January 1, 1902, shall be not less than seven months or thirty weeks, and each such term shall consist of not less than eight hundred hours of work.

The branches of medicine to be included in the course of instruction shall be at least as follows: (1) Anatomy, (2) Physiology, (3) Chemistry, (4) Materia Medica and Therapeutics, (5) Theory and Practice of Medicine, including Ophthalmology, Otology, Dermatology and Neurology, (6) Pathology and Bacteriology, (7) Surgery, including Orthopedic Surgery, (8) Obstetrics, (9) Gynecology, (10) Hygiene, (11) Medical Jurisprudence, (Forensic Medicine.)

ATTENDANCE.

1. Regular attendance during the entire lecture courses shall be required, allowance being made only for absences occasioned by the sickness of the student or his immediate family, such absence not to exceed 20 per centum of the course.

DISSECTIONS, CLINICS AND HOSPITAL ATTENDANCE.

1. Each student must have dissected at least the lateral half of a human cadaver.

2. He shall have received clinical and hospital instruction throughout at least two annual terms.

INSTRUCTION.

The college must have a sufficient and competent corps of instructors, and facilities for teaching, dissections, ambulatory and hospital clinics such as obtain in the majority of medical colleges in the United States.

GRADUATION.

No student shall be graduated by any medical college in "good standing" with the Illinois State Board of Health who has not completed four full terms of lectures as prescribed by the rules of the said Board (certain persons to whom advanced standing is allowed excepted) and has complied with the requirements of the said college, as set forth in the published announcement of the college and has completed in the college by which his diploma is granted a continuous course of lectures in the Senior year of at least seven months in duration.

FURTHER CONDITIONS OF RECOGNITION OF MEDICAL COLLEGES.

RULE 1. Only regularly conducted and legally chartered medical colleges which conform to the conditions of admission to lecture courses, the course and period of study, the number, character and length of lecture terms, the duration of attendance on hospital and clinical instruction, as set forth in the Schedule of Minimum Requirements adopted by the Illinois State Board of Health, and the other requirements of a medical education which obtain as the practice of a majority of the established medical colleges in the United States, shall be considered medical institutions in "good standing" according to the purpose of the Act to Regulate the Practice of Medicine in the State of Illinois, approved April 24, 1899.

RULE 2. No medical college can be held to be in "good standing" until it has established its claim to such standing by an active existence of not less than four years, and then only on compliance with the terms of Rule 1. *Provided*, that colleges which after a personal investigation made by a Committee of the Illinois State Board of Health, are shown to comply with the Schedule of Minimum Requirements and to possess a sufficient and competent corps of instructors, and the necessary facilities for teaching, may, at the discretion of the Board, be granted full recognition during the first year of existence.

RULE 3. All medical colleges in "good standing" with the Illinois State Board of Health will be required to publish in their annual announcements or catalogues a complete list of all matriculates and a separate list of all graduates of the session or year immediately preceding.

RULE 4. No medical college will be considered in "good standing" with the Illinois State Board of Health which publishes in its annual announcement or catalogue, or otherwise, any misrepresentations regarding the curriculum of the college or the facilities for instruction, or the number of students matriculated or graduated.

NOTE.

All colleges in "good standing" with the Illinois State Board of Health will be required to conform to the Schedule of Minimum Requirements in all regular courses commencing on or before January 1, 1903.

Advanced standing to the Sophomore, Junior or Senior Years may be granted to students who have completed courses in the Freshman, Sophomore, or Junior Years, prior to June 30, 1903, in accordance with the Schedules of Minimum Requirements heretofore adopted by the Illinois State Board of Health.

All rules and regulations governing medical colleges which have been heretofore adopted by the Illinois State Board of Health will stand repealed on December 31, 1902.

RECIPROCITY.

Illinois now reciprocates—in the case of physicians' licenses issued after examination—with the following states:

Iowa, Kansas, Maine, Maryland, Michigan, Minnesota, Nebraska, New Jersey, Ohio, Tennessee, Texas, Utah, Vermont, West Virginia, Wisconsin and Wyoming.

Reciprocity will be established with several other states within a short time.

The Illinois State Board of Health does not reciprocate in the case of licenses issued on the presentation of diplomas, without examination. The law of Illinois does not permit this method of reciprocal exchange of medical licenses.

CHICAGO MEDICAL SOCIETY.

Was organized as the Cook County Medical Society, April 5th, 1852. The name was changed to the Chicago Medical Society in 1858. Its objects are the interchange of professional experience, the encouragement of professional zeal, the promotion of friendly feeling and the cultivation of medical knowledge generally.

Any physician of good standing in the profession shall be eligible for membership.

FEE TABLE ADOPTED JUNE 20, 1892.

Intended to guide rather than to govern members in making charges for services rendered to patients in average circumstances, under ordinary conditions.

The minimum and maximum figures have reference to the degree of responsibility and the time consumed in a given case, rather than to the pecuniary circumstances of the patient, which will often call for a lower charge, or may justify a higher one than is indicated in this table.

The fees here given for operations do not include after attendance.

Rush Medical College

West 113.

COR. HARRISON AND WOOD STS.

IN AFFILIATION WITH THE UNIVERSITY OF CHICAGO.

Year Commences June 13th, '09 and Closes June 9th, '10.

Rush Medical College is one of the oldest institutions of learning in the Northwest, chartered by the Legislature of Illinois February, 1837. It was founded by Daniel Brainard, who was its first president. The first course of lectures was delivered in a frame building on Clark Street, near Randolph Street, in 1843. In 1844 a college building was erected at Dearborn Avenue and Indiana Street. This was remodeled and enlarged in 1855.

In 1867 a larger building was erected on the site of the old one, which was destroyed by the fire of 1871. In 1875 the present Clinical Building was erected. The facilities for clinical instruction were largely increased in 1903 by the addition of the Senn Building, adjoining the Clinical Building on the east.

In 1887 the College became the medical department of Lake Forest University. This relation was dissolved in April, 1898. The same month the present affiliation with the University of Chicago was established..

College of Physicians and Surgeons

West 121.

Congress and Honore Streets.

Organized in 1882. Now the College of Medicine of the University of Illinois. Frank B. Earle, M. D., Secretary.

Year Commences Sept. 22d, '09, and Closes June 8th, '10.

The College of Medicine of the University of Illinois is located on the corner of Congress and Honore streets, Chicago, in the heart of the medical quarters of the city. It was founded in the year 1882 by a number of representative physicians and surgeons. In 1892 the College had a thorough reorganization, and erected a commodious laboratory building, the first building exclusively for laboratory purposes erected by any medical institution in the West. Since that time it has grown with steadiness and rapidity. It became the Medical Department of the University in April, 1897.

The College buildings occupy three-fourths of a city block lying between Harrison, Congress, Honore and Lincoln streets, and, for the purposes of medical education, are among the best in the United States. The College building is a brick and stone structure two hundred feet long by one hundred and ten feet deep, and five stories high. It fronts on four streets and stands on a lot entirely adequate in size for such a building, so that it is freely supplied with air and light.

The general equipment of the building and the special equipment of the laboratories are in keeping with the size and character of the building, and may challenge comparison with those of any other school in the country.

Hospitals, Sanitariums and Infirmaries

ALEXIAN BROTHERS HOSPITAL.

Belden and Racine Aves. North 1005. Incorporated March 27, 1869.

The first hospital in America established by this order was a frame building on the corner of Dearborn and Schiller streets, erected in 1866. In 1868 a new building was erected at 569 North Market. After serving the good cause for only three years it was swept away by the great fire of 1871. In 1872 a new building was erected to which a new addition was erected in the spring of 1888. In 1896 the Alexian Brothers built their large and perfectly equipped hospital. Has accommodation for 300 patients, and cost over \$300,000.

St. Mary's of Nazareth Hospital

LEAVITT AND THOMAS STREETS
HADDEN AND OAKLEY AVENUES

TELEPHONE HUMBOLDT 604

Founded May 6, 1904, by the
SISTERS OF THE HOLY FAMILY OF NAZARETH

This institution has been quietly spreading its good influence, and in 1900 the old quarters proved too small. A new site was selected, and the erection of a new Thoroughly Modern Building took place, which was completed March, 1902. The location is ideal.

A garden of 280 x 150 feet, with its beautiful lawns, flower beds and fountain, looks very inviting.

The hospital is constructed of cut stone and pressed brick in the French Renaissance style of architecture. It is 196 x 87 feet and five stories high.

THE EVANGELICAL DEACONESS HOSPITAL

Is an institution of the Evangelical Association. It has a capacity of forty beds, is new, fireproof in construction, and has a noiseless electric automatic elevator. A large germ-proof Pasteur filter provides pure water for general use. The sterilizing, anesthetizing, operating and dressing rooms meet the most scientific requirements. Two house physicians and a corps of about thirty nurses, mostly deaconesses in training, provide good service to patients.

Lake Geneva Sanitariums

THE LAKE GENEVA SANITARIALS comprise three separate institutions, having separate buildings and separate grounds under one management, as follows :

1. Oakwood Springs Sanitarium for mental cases and nervous cases requiring guardianship, with handsome park of seventy-three acres, overlooking the lake and city.

OAKWOOD---MAIN BUILDING

2. Lakeside Sanitarium for medical and general sanitarium cases, with two buildings and grounds of ten acres, charmingly set on the shores of the Lake.

3. The Surgical Hospital for surgical cases exclusively, with well equipped operating room and handsome, airy bedrooms, having large windows and beautiful outlook.

LAKE GENEVA SANITARIUMS

OAKWOOD, FROM SOUTHEAST

These Sanitariums are situated in a region twenty by thirty miles in extent, having the smallest death rate of any such area in the United States. Malaria is here unknown.

Lake Geneva, on the shores of which the Sanitariums are located, is a place of great beauty. It is nine miles long, from one to two miles wide and three hundred feet deep. It is absolutely free from marsh and weeds. It has a great outflow, but

THE TENNIS COURT

LAKE GENEVA SANITARIUMS

no inlet, and is known as the most beautiful spring-fed body of water in the lake regions of Wisconsin, and by many is considered the most beautiful lake in America. Its shores have been sought by the wealth of the middle-west and south, and it is completely bordered with handsome villas and summer homes. The salubrity of the climate and the healthfulness of the location make it unsurpassed for sanitarium purposes.

Every possible out-door diversion has been supplied by nature in her best mood.

IN THE GROUNDS OF OAKWOOD

The grounds of Oakwood consist of a beautifully wooded park of seventy-three acres, overlooking the lake and city of Lake Geneva, and commanding the most delightful and extensive views. It is more than fifty feet above the lake, presents a charmingly

LAKE GENEVA SANITARiums

undulating surface, covered in its entire area by great oaks and magnificent forest trees, together with gardens, orchard and meadow, through which flows the clear and sparkling White river, the outlet of the Lake.

IN THE MEADOW

The Lake Geneva Sanitariums were founded by Dr. Oscar A. King: Oakwood, in 1883; Lakeside, in 1893.

Oakwood was opened for patients in May, 1885. It is a model institution, constructed at a cost of over \$110,000. It is situated on high grounds, in a park of seventy-three acres, of exceptional beauty.

OAKWOOD FROM THE WEST

The plans of Oakwood are such as to give to each patient a room or a suite, as may be required. These communicate with parlors and halls in such a way as to afford, in all suitable cases, the utmost freedom of house and grounds, or, when desired, many of the most pleasant rooms can be entirely isolated from all others. By these plans, therefore, it is possible to permit the greatest freedom, and, at the same time, to protect every patient in Oakwood from annoyance by any other.

A PARLOR

There are no wards. All rooms are private rooms. There are separate parlors and dining rooms for every five or six patients. The bedrooms are large, and all have pleasant outlooks into the park. Many of them have private baths.

The plumbing, heating and electric lighting are new and modern, and the furnishings are of the best.

LAKE GENEVA SANITARIUMS

The system of ventilation is such that any room might be filled with smoke and perfectly cleared in ten minutes with closed windows and doors. The building is fire-proof.

Cheerfulness, comfort and safety have been the controlling ideas in the architecture and management.

No crowding is at any time permitted, and the number under treatment will be governed at all times and entirely by the best interests of the patients themselves.

A DRIVE IN GROUNDS OF OAKWOOD

There are private parlors and dining rooms, trained nurses, teachers and masseurs. There is perfect classification, rest, electricity, baths, mental training and rational treatment.

LAKE GENEVA SANITARIUMS

IN GROUNDS OF OAKWOOD

Apartments can be taken only by patients actually under treatment.

ON LAKE GENEVA

LAKE GENEVA SANITARIUMS

LAKESIDE SANITARIUM, comprising two buildings proper and an amusement hall, is located on the very shores of Lake Geneva, and is utilized for the care and treatment of medical and general sanitarium cases.

LAKESIDE — MAIN BUILDING AND COTTAGE

These admirably equipped buildings still further serve to favor the classification of patients and furnish the needed individuality of treatment essential alike to refinement and the best results.

A GROUP OF NURSES

LAKE GENEVA SANITARIUMS

The grounds of Lakeside are about a half mile distant from those of Oakwood.

A gently sloping and otherwise fine bathing beach, from the grounds of Lakeside, affords pleasure and advantage to patients and guests. Every useful form of bath and hydropathic procedure is provided, together with gymnastic exercises, Swedish movement and massage.

IN GROUNDS OF LAKESIDE

Regular courses of instruction are given in appropriate fields of knowledge. Mental exercise and drills, together with requirements of physical and mental performance, are promoted, with a view to restoring, strengthening or developing the faculties, particularly those of perception and the will. Such treatment is

ON WALK FROM LAKESIDE

important in a very large percentage of general sanitarium cases, particularly in neurasthenia, hysteria, depression and habit. Such a course, not of fanciful suggestion but of instruction, tends to the establishment of attention, interest, ambition, purpose and rational expectation in the patient. With the mending of physical ills should follow action, industry and obedience to the philosophy of a useful life.

Such a course is regarded as a foundation stone in a permanent cure of hysteria and many other habit symptoms, the result of neuropathic constitution, irrational living, slipshod and vicious education and idle indulgence—cases that can seldom be treated successfully at home.

THE LAKE FROM LAKESIDE

LAKE GENEVA SANITARIUMS

A large wooded city park, handsome and quiet, abuts the grounds of the Sanitarium, without barrier on the east, lying immediately back of the Sanitarium. The lake borders the acres of sanitarium grounds in front and to the west, thereby affording quietude and a delightful outlook from the windows of every room. There are broad porches, wide sunny lawns, fine trees, deep shade and excellent playgrounds.

PARLOR IN COTTAGE

AMUSEMENTS:

In summer, bathing, boating, fishing, sailing, wheeling, golf, tennis, riding and driving are available for patients who have the inclination or for whom it is desirable. In winter, sleighing, skating, ice boat sailing and all outdoor winter sports are available under the most agreeable circumstances. Within doors, billiards, books, social entertainments and agreeable associations pass the time acceptably and with benefit to all.

LAKE GENEVA SANITARIUMS

THE COTTAGE IN WINTER

LABORATORY:

Trained assistants are employed in the use of instruments of accuracy and methods of procedure in chemical, microscopical and physical examinations. This, combined with thorough methods of investigation in the psychological department, facilitates the formation of a rational judgment in each individual case.

FOR DIAGNOSIS:

At the request of their physicians, patients will be admitted for diagnosis and report only. It has proven advantageous in certain cases, not necessarily requiring sanitarium treatment, but requiring

CROQUET AT LAKESIDE

LAKE GENEVA SANITARIUMS

time for investigation, to come to the Sanitarium to remain a few days until this object has been attained. Particular application is here made to cases suffering from diseases of the nervous system.

In case of patients admitted to the Sanitarium for diagnosis, a residence in the Sanitarium for a period of from three to ten days is desirable.

THE COTTAGE IN SUMMER

Quick communication from distant points may be had by telephone or telegraph. From points within 200 miles, the long distance telephone is generally more satisfactory.

From points other than Chicago it is best to call the Sanitarium direct, rather than the city office. Consult map and time tables on pages 184 and 185.

LAKE GENEVA SANITARIUMS

TERMS will be given on application. The charges will be made as low as the expense and character of the service to be rendered will admit of, and depend upon the condition and requirements of the patient, the rooms occupied, etc.

PHYSICIANS CALL LONG DISTANCE telephone at Sanitarium's expense.

Physicians desiring to make inquiry concerning the admission of patients can save time by calling, by long distance telephone, the superintendent or other resident physician at the Sanitarium, requesting the operator to *reverse the charges*.

When notified of the time of expected arrival in Lake Geneva, a carriage will be sent to the station to meet patients arriving.

LOCATION AND TRAINS

The location of Lake Geneva is shown on the accompanying map.

From Chicago, Lake Geneva is best reached via the Chicago & North-Western Railway.

From La Crosse, Madison, Freeport, Beloit, Racine and Milwaukee it may be reached via Chicago, Milwaukee & St. Paul Railroad, alighting at Springfield, Wis. All trains are met at Springfield by omnibus for Lake Geneva—a short ride over a good road.

Coming from the north and northwest, it is frequently convenient to go south as far as Crystal Lake, changing cars at Crystal Lake to the regular North-Western trains for Lake Geneva.

Trains leave Chicago for Lake Geneva over the North-Western Railway, via Crystal Lake, as follows:
